

## Case Study – Retail

### Requirement

Petcare is a modern retail outlet in the fashionable 'Capitol Park' in Leeds. It was imperative that the shop was in keeping with the buildings within 'Capitol Park'. The end client wanted the building to benefit from as much natural light as possible using a series of modular rooflights. Therefore, the roofing system chosen had to accommodate this and ensure easy installation around any penetrations in the roof deck whilst ensuring the roof remained watertight.

### Solution

Protan SE 1.2 Standard Overlap was used on this project as the most effective and appropriate roofing solution. The mechanically fixed membrane requires no adhesives or solvents making it a more environmentally friendly solution ensuring 100% recyclability of the end of the roof's lifecycle. Protan's membrane can easily be installed and affixed to changes of angles and penetrations to the roof making it the ideal roof covering. The addition of Protan Omega Profile adds an attractive symmetrical finish, resulting in a roof of the highest quality.

### Warranty

A 15 year warranty is standard on all Protan SE mechanically fixed systems. This comes with an assurance that all Protan (UK) Ltd products have excellent durability and high performance under extreme weather conditions.

Please contact Protan for further details.
